Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Danz et al., U. S. Patent No. 5805020.

Regarding claim 1, Danz et al. (herein, Danz) discloses a silent start class d amplifier. Danz's disclosure comprises an audio signal input, which reads on an audio signal, a comparator, which reads on a circuit capable of converting the audio signal, and an amplifier (col.2, lines 26-56 and col. 5, lines 20-48 and figures 4 and 5).

Regarding claim 2, Danz discloses everything claimed as applied above (see claim 1). Danz discloses a logic (figures 4 and 5), which indicates a logic array, wherein it is inherent that clock is provided with a predetermined frequency as evident by the characteristics and make of logic circuits or means.

Regarding claim 3, Danz discloses everything claimed as applied above (see claim 1). Danz inherently discloses a ripple count included in a logic means (figures 4 and 5), as evident by the characteristics and make of logic circuits or means.

Regarding claim 4, Danz discloses a silent start class d amplifier. Danz's disclosure comprises an audio signal input, which reads on an audio signal, a comparator, which reads on a means of comparing, an amplifier and logic, which indicates a logic array, wherein it is

inherent that clock is provided with a predetermined frequency as evident by the characteristics of logic means - (col.2, lines 26-56 and col. 5, lines 20-48 and figures 4 and 5).

Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 10 is allowed.

Response to Arguments

Applicant's arguments filed 5/3/05 have been fully considered but they are not persuasive.

The applicant essentially argues the at prior art of record fails to disclose the claimed invention in respect to the "... a pulse train with a frequency that varies with the frequency of the audio signal...". The claimed invention has been considered and examiner under the broadest interpretation of the invention, wherein the claim language of the claimed invention fails to specifically limit or imply what is meant by term, "proportional" or how the pulse train is proportional the frequency of the audio signal. The claim language fails to recite, "...a pulse train with a frequency that varies with the frequency of the audio signal...". Thus, the Danz et al. rejection is maintained.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
